cannot be used with any other promotional items

coupon code 0625a

*Equipment eligibility for the ESA is that it must be within a maintainable level before we can cover it. The technician will evaluate the condition of the equipment. If it appears that the initial cleaning of the system will require additional time or materials, the technician will then quote a flat rate price on what the needs are to properly prepare the equipment. If the cleaning is within the guidelines of the ESA, the equipment can be covered under the Agreement terms at the coordinating Agreement cost.
